**Revised Pricelist w.e.f. 1-May-2019**

TITLE	AUTHOR	EDITION	PRICE	YEAR	ISBN	WEIGHT (Grm)	SIZE	PAGES	CATEGORY	ANNOTATION
STATISTICAL ASPECTS IN INTELLECTUAL PROPERTY RIGHTS: NEED FOR NEAR FUTURE	CHETAN VERMA	HARDBACK	Rs 800	2019	9788193887257	375	6.25"X9.25"	124		The book covers topics in IPR, including conversion and interpretation of relative quantitative and qualitative facts with their analysis. The technical standards related to these facts are also covered in detail. It is hoped that this book will provide and guide the reader in further understanding of both the facts and theories and their analysis.
GEARING-UP STRATEGIES AND ACCELERATING RESEARCHES FOR ATTAINING FOOD AND NUTRITION SECURITY	PREM NATH	HARDBACK	Rs 3,600	2019	9788193887226	850	6.25" X 9.25"	384	Science & Technology, Agriculture, Food and Nutrition	The publication provides valuable information and thoughts on the steps to be undertaken to strengthen research area, which is of utmost importance in combating hunger and malnutrition. It is intended to attract attention of developing nations, policy and programme developers, researchers on agriculture and food, managers of food and nutrition security programs, university faculty members and interested readers including consumers.
JAIVIK KHETI KE NUSKHE (In Hindi)	BANKATESH NARAYAN SINGH	HARDBACK	Rs 1,200	2019	9788193887240	550	6.25" X 9.25"	300	Science & Technology, Agriculture, Horticulture, Organic farming, Environment, Agri Extension	Jaivik Kheti Ke Nuskhe is a comprehensive manual on organic farming describing its benefits, methodology, different & similar agricultural practices, world organic trade, organic movement, organic certification and everything that any person associated with organic activities would want to know. Organic farming can be practiced with help of organic inputs described in the book.

BIODIVERSITY, AGROECOCLOGY, REGENERATIVE ORGANIC AGRICULTURE: SUSTAINABLE SOLUTIONS FOR HUNGER, POVERTY AND CLIMATE CHANGE	VANDANA SHIVA & ANDRE LEU	HARDBACK	Rs 1600	2019	9788193887219	650	6.25" X 9.25"	368	Science & Technology, Agriculture, Organic farming, Agronomy, Soil Science, soil physics, environmental sciences, agricultural economics and extension	The book is an interdisciplinary synthesis of research and practice carried out over decades by leaders of the agroecology and regenerative organic agriculture movement. It provides a detailed analysis of the multiple crises we face due to chemical and industrial agriculture, including land degradation, water depletion, biodiversity erosion, climate change, agrarian crises and health crises. The book lays out biodiversity based organic farming and agroecology as the road map for the future of agriculture and sustainable food systems. With detailed scientific evidence the book shows how an ecological agriculture based on working with nature rather than abasing ecological laws that can regenerate the planet, the rural economy and our health.
SYSTEM BASED CONSERVATION AGRICULTURE	V.K. SINGH, B. GANGWAR	HARDBACK	Rs 2,500	2018	9789383491889	625	6.25" x 9.25"	272	Science & Technology, Agriculture, Agronomy, Soil Science, , soil physics, environmental sciences, farm machinery and power, agricultural economics and extension	Conservation Agriculture (CA) aims to achieve sustainable and gainful agriculture by improving farmer's livelihood through the adoption of the three principles, i.e. minimum soil disturbance, need-based residue retention and profitable crop rotation. A series of experiments and studies with CA principles applicable to varying crops and soil agro-ecologies have been conducted, but the documentation of system based standardized CA practices remains essential. The present publication deals with the scope and significance of refinement, adoption and dissemination of CA in Indian <i>vis-à-vis</i> global context. Through this book, an attempt has been made to help readers to gain a precise understanding of the role of mechanization and the necessity for suitable <del>modifications in the existing machinery for</del>
MANUAL ON ADVANCED TECHNIQUES FOR ANALYSIS OF NUTRIENTS AND POLLUTANT ELEMENTS IN SOIL, PLANT AND HUMAN	S.P. DATTA, M.C. MEENA, B.S. DWIVEDI, A.K. SHUKLA	HARDBACK	Rs 900	2018	9789383491872	425	6.25" X 9.25"	148	Science & Technology, Agriculture, Soil Science	Analysis of soil and plant samples is an important tool for assessing plant nutrient need for formulation of crop and site-specific nutrient recommendations for higher economic return as well as to minimize risk of environmental pollution . . . This laboratory manual entitled "Manual on Advanced Techniques for Analysis of Nutrients and Pollutant Elements in Soil, Plant and Human" covering methodologies for assessing status of nutrients and pollutant elements in soil-plant-human continuum, their distribution in different soil fractions, and protocols for risk assessment of polluted soils provides a timely and needed updates of new and simplified analytical procedures available today .

ADVANCES IN ORGANIC PRODUCTION OF FRUIT CROPS	HARCHARAN DASS, A.K. YADAV	HARDBACK	Rs 3,000	2018	9789383491995	875	6.25" X 9.25"	392	Science & Technology, Agriculture, Horticulture, Organic farming, Environment, Agri Extension	This book is an excellent compilation of modern science and traditional wisdom and attempts to provide best possible management solutions for optimum productivity in different fruit crops, largely relying on on-farm input management approaches. Recommendations on use of multiple nutrient sources in combination with intercrops, green manures and cover crops and multiple applications through soil application and foliar feeding are most outstanding features . . . Pest management solutions largely based on IPM approaches while relying on
CYCLE OF NUTRIENTS, NUTRITION AND NUTRITION SECURITY IN EARTH, PLANT, LIVESTOCK AND HUMAN	PREM NATH	HARDBACK	Rs 4,000	2018	9789383491988	875	6.25" x 9.25"	400	Science & Technology, Agriculture, Horticulture, Food and Nutrition	The book uniquely provides a very comprehensive outlook and addresses the burning issues of nutrients and its link with nutrition, the mis-link between soil, plant, life stock and humans, apart from nutrition from ocean which is not so perturbed by humans so far and there is still that protected nutrition region in the globe ! The book apparently would shine as a wonderful reference material for policy makers and planners and perhaps would also serve the researchers.
TROPICAL TUBER CROPS: POTENTIAL AND PROSPECTS	JAMES GEORGE, S. SUNITHA	HARDBACK	Rs 4,000	2018	9789383491964	875	6.25" x 9.25"	396	Science & Technology, Agriculture, Horticulture, Vegetable Science	Tropical tubers serve one-fifth of world population in the tropics and sub-tropics as secondary or subsidiary food. Cassava, sweet potato, aroids (taro, tannia and elephant foot yam), yams (greater yam, lesser yam and African white yam), coleus, arrowroot etc., are the most important tropical tuber crops. These crops possess high biological efficiency as food producers and can serve as substitute for cereals due to higher carbohydrate and calorie content. They also serve as raw material for sago, starch related industrial products and animal feed. Many of the tuber crops are also known to possess special medicinal properties which are a part of the traditional knowledge in tuber crop growing regions of India, especially among the tribal population. This book encompass the traditional and ethnic cultivation practices of various tuber crops in different states of India and the benefits accrued by the farmer due to interventions made by the All India Coordinated Research Project on Tuber Crops through introduction of high yielding varieties, agro-techniques and post harvest technology.

RECENT ADVANCES IN THE SYNTHESIS OF PHOSPHONATES BY MICHAELIS-ARBUZOV REACTION	G. SYAM PRASAD	HARDBACK	Rs 1,000	2018	9789383491827	500	6.25" x 9.25"	148	Science & Technology, Agriculture, Chemistry	This book gives the information about synthesis of phosphonates <i>via</i> Michaelis-Arbuzov reaction. Synthesis of organic compounds through microwave method is an ideal method for rapid reaction scouting and optimization of reaction conditions. Solvent free conditions and ionic liquid promoted synthesis are best methods in green chemistry which are highlighted in this book. The synthesis and reaction mechanism are illustrated with in detailed examples. The recent literature has been reviewed with new examples to demonstrate reactions with better explanation.
IMPACT ASSESSMENT OF INDIAN AGRICULTURAL INFORMATION SYSTEM	K. VEERANJANEYULU, N.S. RATHORE, M.B. CHETTI	HARDBACK	Rs 1,300	2018	9789383491971	500	6.25" x 9.25"	168	Agriculture, Agriculture Education, Agriculture Extension	The Indian National Agricultural Research and Education System (NARES) is one of the biggest academic and research systems in the world, effectively working in close association with agricultural research, education and extension. It has huge repository of knowledge and information on agriculture and allied sciences. Considering the significance of the library and information services to ensure quality education and research, the NARES initiated many laudable library modernisation projects in a phased manner. E-Granth is a milestone project in which 39 major agricultural libraries in India were liberally supported to meet the requirements of the stakeholders in the networked digital environment. This publication attempts to document the usage pattern of agricultural information systems and assess the impact of agricultural consortia from the data collected from the 39 e-Granth partner libraries. Based on the findings of the study, future action plan / road map for effective usage and strengthening of agricultural information systems are suggested.
TISSUE CULTURE: UNLOCKING THE SECRETS TO CREATE A SUCCESSFUL TISSUE CULTURE ENTERPRISE	M.JAYANTHI, AKRITI SHARMA, MOHIT KUMAR, NEERU BHOOSHAN	PAPERBACK	Rs 250	2017	9789383491896	100	5.5" x 8.5"	44	Science & Technology, Agriculture, Tissue culture, Agri Business, Horticulture	It has been realized that there is a wide scope of entrepreneurial activities in and around tissue culture, it has been thought of creating a document that will provide the complete information about setting up a tissue culture enterprise. While searching the already published documents, it has been realized that there is a vacuum of recent and specific information on this aspect especially related to costs & prices. In this DPR we had tried our best to put all the recent information with detailed calculations so that it will carry a real meaning for the entrepreneur. We wish to ensure that the budding entrepreneurs get 3R's of information Right Quality, Right on time and Right amount.

ORGANIC AGRICULTURE PRACTICES: A TRAINING MANUAL	DHARAMVIR SINGH YADAV	PAPERBACK	Rs 275	2017	9789383491902	200	6.25" x 9.25"	104	Agriculture, Organic farming, Agriculture extension	This manual makes an attempt to present the available information on organic agriculture practices in a cogent and easily understandable manner supported by numerous diagrams. It contains seven chapters and three annexures, which cover principles of organic farming, nutrient management, pest management and methods of preparation of on-farm inputs; natural pests control techniques and bio-dynamic preparations. It is hoped that this manual will serve as a reference source for those interested in practicing organic agriculture and extension workers.
SILICON IN INDIAN AGRICULTURE	N.B. PRAKASH, N.K. SAVANT, K.R. SONAR	HARDBACK	Rs 1,200	2018	9789383491957	525	6.25" x 9.5"	198		
CLASSICAL BIOLOGICAL CONTROL: Insect Pests and Weeds	R.D. GAUTAM	HARDBACK	Rs 3,000	2018	9789383491940	1000	6.25" x 9.5"	468	Science & Technology, Agriculture, Entomology, Plant protection, Organic farming, Weed Management	Due to global trade liberalization on import and export of agricultural produce, planting material and flourishing tourism, the risks of exotic and invasive pests have increased in the recent years by many folds. As a result there is a dire need to safeguard agriculture and allied industries which are likely to be affected by accidental introduction of exotic and alien species. Classical Biological Control (CBC) is a sound and sustainable way to safeguard the biodiversity ravaged by the introduced pests in the area of agriculture, forestry as well as vectors associated with human and animal health. In this direction, the book provides an insight to tackle exotic pest problems through CBC. The book also highlights the need, procedures, success stories and simple field characters to identify important insect species and their sexes; which is the outcome of author's long national and international exposure on the subject. Interestingly, it suggests value addition and use of potential biocontrol agents as biological gold due to their higher nutraceutical and therapeutic properties, which is a new dimension to be explored in order to improve the economy of resource poor communities.
PAROPKARITA KI PRAKASHTHA (Hindi)	PRIYANKA JAISWAL	HARDBACK	Rs 500	2017	9789383491933	375	5.5" x 8.5"	144		

TROPICAL ORNAMENTAL TREES FOR LANDSCAPE GARDENING	M. KANNAN, P. RANCHANA, S. VINODH	HARDBACK	Rs 3,000	2017	9789383491858	750	6.25" X 9.5"	292	Science & Technology, Agriculture, Horticulture, Floriculture and Landscaping, Silviculture, Agronomy	This book is an effort to compile all information regarding ecological adaptation and characteristics of ornamental trees, propagation, care and management, ornamental trees suitable for landscaping and other purposes and tree transplanting techniques. It also contains a chapter on ornamental trees for pollution mitigation which focuses on greening of urban environment to mitigate pollution. Moreover, the book acts as a quick reference guide to know about the ornamental trees which are suitable for different regions (tropical areas and sea side) and for different purposes like planting in home gardens, industrial and institutional gardens, roadsides, avenues, public gardens, parks, apartments, corporate offices and other public places.
INTRODUCTION TO SOIL PHYSICS	PRADEEP K. SHARMA	HARDBACK	Rs 3,000	2017	9789383491865	1100	6.25" X 9.5"	528	Science & Technology, Agriculture, Soil science, Environmental Science.	The book covers basic as well as advanced, theoretical and applied aspects of soil physical principles and processes in easily understandable language, supported by practical numerical problems. Each chapter is followed by a set of questions, along with their answers, which would further help readers to clear their concepts about soil physics.
MECHANIZATION IN PLANTATION CROPS	A.C. MATHEW, M.R. MANIKANTAN, P. CHOWDAPPA	HARDBACK	Rs 2,500	2017	9789383491834	500	6.25" X 9.5"	180	Science & Technology, Agriculture, Food Processing, Horticulture, Agri-Extension.	The book discusses all the developments in mechanization of major activities of land preparation, intercultural operations, irrigation, harvesting and post harvest operations of major plantation and spices crop.
ATTAINING FOOD & NUTRITION SECURITY IN THE DEVELOPING WORLD	PREM NATH	HARDBACK	Rs 4,000	2017	9789383491841	1100	6.25" X 9.5"	576	Science & Technology, Agriculture, Food and Nutrition.	The book establishes the linkage among the producer cum consumer - the farmer, farming community - the society and the food. It provides the roadmap for sustainable agriculture.
SABZI UTPADAN EVAM SANSADHAN KE UNNAT KRISHI YANTRA EVAM PRADYOGIKIYAN (Hindi)	PK SAHU, RANBIR SINGH, AP SRIVASTAVA, CB SINGH	HARDBACK	Rs 1,500	2017	9789383491308	500	6.25" X 9.5"	188		
ICT BASED AGRICULTURAL EXTENSION INITIATIVES IN INDIA	V. SANGEETHA, J.P. SHARMA, R.R. BURMAN, S.K. DUBEY, M.S. NAIN	HARDBACK	Rs 2,000	2017	9789383491193	650	6.25" x 9.5"	288	Science & Technology, Agriculture, Agriculture Extension	The book is an attempt to document Information and Communications Technology (ICT) in agriculture for sustainable development and poverty reduction in the society, making available the right information to the right person at the right time at low cost.
KINETICS OF BIOCHEMICAL LIGANDS	HARITMA CHOPRA	HARDBACK	Rs 1,200	2016	9789383491292	600	6.25" X 9.5"	278		

HORTICULTURE FOR INCLUSIVE GROWTH (Three Vol Set)	K.L. CHADHA, PRITAM KALIA, S.K. SINGH	HARDBACK	Rs 7,500	2016	9789383491612	2200	6.25" x 9.5"	1042	Science & Technology, Agriculture, Horticulture.	The book discusses the issues confronting the present day horticulture, so as to be better prepared for meeting the emerging challenges and future needs. Emphasis has been given on cutting edge technologies and biotechnological tools, genomics, hi-tech horticulture, management of waste lands, precision breeding methodologies, GM technologies, mitigation and management of abiotic and biotic stresses covering climate change , salinity, moisture stress and IPM and pesticidal residues.
FOOD EXPECTATIONS OF THE PEOPLE IN THE NEW MILLENIUM: The Basics of Human Civilization - Food, Agriculture and Humanity	PREM NATH, C.P.A. IYER, O.P. DUTTA, K.R.M. SWAMY, B.S. PRABHAKAR, P.B. GADDAGIMATH	HARDBACK	Rs 3,600	2016	9789383491360	1075	6.25" x 9.5"	612	Science & Technology, Agriculture, Rural & Urban Development, Food and Nutrition.	The book deals with the basics of human civilization in relation to the evolution of agriculture and family farming. It will help to understand the evolutionary and anthropogenic roots of modern day agriculture.
WRITING CLIMATE CHANGE	B.N. NEELIMA	HARDBACK	Rs 800	2016	9789383491322	450	6.25" x 9.5"	182	Environment, Climate Change, Science & Technology, Geography, Sociology.	The book explains the basics of climate change concisely in engaging, non technical language and describes how it will affect various sections and segments of the society.
DECODING CODEX ALIMENTARIUS: A Step-by-Step Guide to Understand the Role and Working of Codex Alimentarius Commission	VINOD KOTWAL	HARDBACK	Rs 2,000	2016	9789383491315	650	6.25" x 9.5"	272	Science & Technology, Policy Makers, Food Technology, Food Producers, Processors and Consumers.	The book is a one stop guide for unravelling and demystifying the world of Codex Alimentarius Commission (CAC). It covers various aspects of CAC, the body responsible for implementing the joint FAO/WHO Food Standards Programme to protect the health of consumers and ensure fair practices in food trade.
FIGHTING PESTICIDE RESISTANCE IN ARTHROPODS	M. MOHAN, T. VENKATESAN, MAHESH S. YANDIGIRI, ABRAHAM VERGHESE	HARDBACK	Rs 1,500	2016	9789383491285	600	6.25" x 9.5"	252	Science & Technology, Agriculture, Entomology.	The book is concisely written to provide latest information about the ever changing field of pesticide resistance in insect, pest and mites. It gives information on recent facts about insecticide resistance, insecticide classification mode of action, mechanism of resistance and resistance management strategies.

ENVIRONMENT AT A GLANCE	SARANJEET KAUR	HARDBACK	Rs 600	2015	9789383491278	400	6.25" x 9.25"	192	Science & Technology, Agriculture, Environment.	This book is Dr Kaur's maiden attempt targeted at students appearing for PG Entrance Exams, UGC-CSIR NET, GATE, ICAR-ARS/NET, Civil Services, etc. and is written in a very simple, crisp and easy to comprehend language. It covers the syllabus of Environmental Education of Panjab University and has many Appendices and MCQs which serve as a ready reckoner for the students. It contains revised data on number of upcoming parks under the "Protected Area Network" in India that includes National Parks, Wildlife Sanctuaries and Biosphere Reserves. Since United Nations has declared the years 2011-2020 as Decade of Biodiversity, it would be apt to provide a revised figure on number of tiger reserves and biodiversity hotspots, which has been done in the book. Important topics such as status of vulture conservation in India, Narmada Bachao Andolan, Tehri Dam Conflict, Biodiesel, Bt-Cotton, Flavr Savr, newly discovered Green House Gases, Harike Pattan Wetland, Bird Flu and r/K selection strategy of nature have been emphasized upon. The book also has revised state birds, animals and flowers.
INTRODUCTION TO TURFGRASSES	T. JANAKIRAM, NAMITA, RITU JAIN	HARDBACK	Rs 800	2015	9789383491261	450	6.25" x 9.25"	160	Science & Technology, Agriculture, Horticulture, Landscaping and floriculture	The changing life style, environment and higher expandable income have provided new dimensions to the turfgrass research and management in India. This book features important aspects of turfgrasses viz., turfgrass identification, classification, turfgrasses for home lawns and various sports fields establishment and maintenance, equipments and machinery, plant protection including weed management and opportunities in turf management.

DEVELOPMENT TRENDS IN URBAN AND PERI-URBAN AGRICULTURE	R.S. DESHPANDE, PREM NATH, P.G. CHENGAPPA, ELUMALAI KANNAN, K.R.M. SWAMY, C.P.A. IYER	HARDBACK	Rs 1,800	2015	9789383491223	675	7.5" x 9.5"	230	Science & Technology, Agriculture, Horticulture, Landscaping and floriculture, Agri Economics	In early days, people migrated in search of food and in the last century we learnt of trans-migration of people from densely populated areas to less-densely populated areas prompted by the government. In the new millennium, we are facing the problem of massive migration of people on their own initiative from rural to urban area leaving the governments of developing countries to address the emerging issues, which seem serious. The way out is either to take measures to arrest the migration at government's initiative or allow the urban population to grow and provide basic needs and amenities to the migrated people of the megacities. The estimation indicates that within this millennium urban population will surpass the rural population so much so that 70 percent of the population will reside in cities during 2050. The major factors influencing the migration of people from rural to urban area are poor socio-economic status and search for better living, gainful employment with better facilities which urban area is building up steadily. While efforts are being made in all sectors to develop urban area, the major issue to be addressed is the food security without which efforts in all other sectors may not succeed. The present publication addresses efforts on food security of the urban population. The peri-urban agriculture serving as a buffer-zone between rural and urban area, is emerging as the focal
PHYTOPHTHORA DISEASES OF PLANTATION CROPS	JACOB MATHEW, C. BINDU ROY, C. KURUVILLA JACOB, N. RAMACHANDRAN	HARDBACK	Rs 2,000	2015	9789383491247	750	8.5" x 11"	176	Science & Technology, Agriculture, Horticulture, Plantation Crops, Plant Pathology	This is a compilation of papers presented during the symposium 'Phytophthora 2011' conducted by Rubber Research Institute of India, Kottayam, to commemorate the first appearance of abnormal leaf fall disease of rubber caused by Phytophthora, reported during 1910 and Golden Jubilee Year of copper oxychloride recommendation for its control. In a nutshell, this publication is a reflection on the present status of research on Phytophthora both on basic and applied aspects in India and at global level. This compendium of papers on Phytophthora would provide guiding principles for specialists, teachers, students and researchers as it disseminates essential information on all aspects of Phytophthora delivering ample leads into the new avenues of scientific research

HORTICULTURE FOR INCLUSIVE GROWTH (Vol 1): Food Livelihood and Environmental Security	KL CHADHA, PRITAM KALIA, SK SINGH	HARDBACK	Rs 3,250	2016	9789383491582	825	6.25" x 9.5"	412	Science & Technology, Agriculture, Horticulture.	The book discusses the issues confronting the present day horticulture, so as to be better prepared for meeting the emerging challenges and future needs. Emphasis has been given on cutting edge technologies and biotechnological tools, genomics, hi-tech horticulture, management of waste lands, precision breeding methodologies, GM technologies, mitigation and management of abiotic and biotic stresses covering climate change , salinity, moisture stress and IPM and pesticidal residues.
HORTICULTURE FOR INCLUSIVE GROWTH (Vol 2): Crop Production	KL CHADHA, PRITAM KALIA, SK SINGH	HARDBACK	Rs 3,250	2016	9789383491599	825	6.25" x 9.5"	406	Science & Technology, Agriculture, Horticulture.	The book discusses the issues confronting the present day horticulture, so as to be better prepared for meeting the emerging challenges and future needs. Emphasis has been given on cutting edge technologies and biotechnological tools, genomics, hi-tech horticulture, management of waste lands, precision breeding methodologies, GM technologies, mitigation and management of abiotic and biotic stresses covering climate change , salinity, moisture stress and IPM and pesticidal residues.
HORTICULTURE FOR INCLUSIVE GROWTH (Vol 3): Post Harvest Management	KL CHADHA, PRITAM KALIA, SK SINGH	HARDBACK	Rs 1,750	2016	9789383491605	525	6.25" x 9.5"	224	Science & Technology, Agriculture, Horticulture.	The book discusses the issues confronting the present day horticulture, so as to be better prepared for meeting the emerging challenges and future needs. Emphasis has been given on cutting edge technologies and biotechnological tools, genomics, hi-tech horticulture, management of waste lands, precision breeding methodologies, GM technologies, mitigation and management of abiotic and biotic stresses covering climate change , salinity, moisture stress and IPM and pesticidal residues.
CULTIVATING ORGANIC VEGETABLES: Package of Practices	HARCHARAN DASS, AK YADAV, YP SINGH	HARDBACK	Rs 1,800	2015	9789383491162	750	7.5" x 9.5"	292	Science & Technology, Agriculture, Horticulture, Organic farming, Agri Extension	This book is a timely intervention that attempts not only to fill the gap in knowledge but also ensures integration of the traditional wisdom with science to bring about best possible management solutions for vegetable cultivation in compliance with the standards of organic production . . . The details provided in the book are just not the compilation of literature, but it is an outcome of experience earned over four years during implementation of organic agriculture program on 87,000 ha area spread over seven states . . . I congratulate the authors and International Traceability Systems Ltd for their novel effort in bringing out very useful information on different aspects of organic vegetable production in one volume for the benefit of extension workers, trainers, farmers interested in organic production of agricultural commodities
GENESIS OF MODERN INDIA: From the Gadar to a Revolution	DHARMENDRA GOEL	HARDBACK	Rs 1,200	2014	9789383491216	575	6.25" x 9.25"	292		

PRODUCTION, HANDLING & PROCESSING OF SPICES	I.S. SINGH & VINOD SINGH	HARDBACK	Rs 1,200	2015	9789383491124	575	7.5" x 9.5"	202	Science & Technology, Agriculture, Horticulture, Spice Science, Post Harvest Technology, Agri Extension	Primary processing at the farm level and subsequent handling, storage and distribution have a paramount influence on the quality of dried spices and their products. There will be a value addition for these whole spices if they are properly processed and packed. Preparation of spice, paste and liquid for different end users have become popular . . . the book gives a comprehensive picture on the production and post harvest management of spices. The authors have made an excellent effort to compile the scientific information on production, handling and processing technology of commercial spices at a single source for better understanding of each crop. This can be of great use to students, teachers, researchers, extension workers, processors and progressive farmers.
FRUIT CROPS: PRODUCTION, HANDLING AND PROCESSING	I.S. SINGH & VINOD SINGH	HARDBACK	Rs 2,400	2015	9789383491186	1000	7.5" x 9.5"	408	Science & Technology, Agriculture, Horticulture, Pomology, Post Harvest Technology, Agri Extension	This book contains the latest information on scientific crop production, handling and processing of tropical, sub-tropical and temperate fruits at single source for better understanding of each crop.
PRODUCTION, HANDLING & PROCESSING OF COMMERCIAL VEGETABLE CROPS	I.S.SINGH & SANJEEV KUMAR	HARDBACK	Rs 1,800	2015	9789383491155	675	7.5" x 9.5"	216	Science & Technology, Agriculture, Horticulture, Vegetable Science, Post Harvest Technology, Agri Extension	Information on production, handling and processing of commercial vegetables is not available collectively at single source. The authors have made an excellent effort to compile the scientific information on production technique, handling and processing of commercial vegetables at single source for better understanding of each crop. The book gives comprehensive picture on the production and post harvest management of vegetable crops. This is oriented for undergraduate and postgraduate programmes in vegetable.
DIAGNOSTICS TOOLS FOR IDENTIFICATION AND DETECTION OF PHYTOPHTHORA	P. CHOWDAPPA	HARDBACK	Rs 2,000	2014	9789383491018	750	7.5" x 9.5"	212	Science & Technology, Agriculture, Horticulture, Plantation Crops, Plant Pathology	It offers experimental tips for choice and preparation of selective media, isolation and culturing, basic methods for morphological identification, DNA isolation, different marker loci, DNA sequence and gel based identification, separation of subpopulations, genus and species-specific diagnostic markers, isozyme analysis, protein profiles, basics of whole genome sequence analyses and identification markers of exotic <i>Phytophthora</i> species. This practical guide aimed at serving the needs of post graduate research students, plant pathologists, molecular biologists and biotechnologists and disease diagnosticians in plant quarantine laboratories for resolving issues related to management of devastating plant pathogen <i>Phytophthora</i> .

AGRICULTURAL EXTENSION: The Changing Structure	PARVEEN KUMAR	HARDBACK	Rs 800	2014	9789383491100	500	7.5" x 9.5"	152	Science & Technology, Agriculture, Agri Extension	The book reviews different agricultural extension strategies being put to use in different countries along with evaluative studies. It discusses at length the emerging approaches like farmer led extension, the participatory techniques and the partnership agreements. The ATMA model has been elaborately mentioned along with some evaluative studies. The potential of information and communication technologies in reaching the unreached is now being exploited. The book has very useful information regarding the private sector initiatives like the TKSL, Digital Green, RML, the e-Choupal initiative and various small-scale models which are providing farmers with information not only regarding on-farm production but also regarding prices and accessing markets. Various extension approaches and models that are operating in different corners of the country though on small scale are doing very well in terms of providing timely and relevant information to the farmers. The book is full of examples with such type of local initiatives which need to be replicated at a larger scale.

RECENT TRENDS IN MICROBIAL DIVERSITY & BIO-PROSPECTING	G. PRASADA BABU & PARAMAGEETHAM CHINTHALA	HARDBACK	Rs 1,800	2014	9789383491148	700	7.5" x 9.5"	242	Science & Technology, Agriculture, Biotechnology, Environment science	Microbial diversity is the key to human survival and economic well being and provides a huge reservoir of resources which we can utilize for our benefit. Focus on microbial diversity is very important in the present day scenario to combat new and emerging disease problems and to advance biotechnology. New technologies, particularly in nucleic acid analysis, computer science, analytical chemistry, habitat sampling and characterizations place the study of microbial diversity on the cutting edge of science. Despite the acknowledged value of microorganisms, our knowledge of their diversity and many of their key roles in sustaining of global life supporting systems is still very scarce. Exploration, evaluation and exploitation of microbial diversity are essential for scientific, industrial and social development. It is even more relevant in India due to its enormous wealth of diverse bio-diversity. This vast microbial diversity of the natural world combined with indigenous methods to access the diversity can provide us with a bountiful source of new and valuable products. This book is an attempt to arrange diverse microorganisms and their potential

TELEVISION VIEWING AND CHILDREN: DETERMINANTS, CORRELATES & IMPACT	B.N. NEELIMA	HARDBACK	Rs 1,100	2014	9789383491131	500	6.25" x 9.25"	246	Communication and Media Studies, Human Development and Family Studies, Psychology and Education, Behavioural Science	This book is unique in the sense that it explores certain determinants and correlates of children's television viewing. Though several studies on the effects of television viewing on children have been carried out in the west, very few studies have tried to analyse the same in the Indian context. The book is also important because it explores the holistic environment in which the viewing occurs and examines its effects on important parameters of a child's life. Academic achievement, leisure time activities and social and emotional behaviour are important correlates for a growing child and the present study examines the effect of television viewing on these parameters. The book will be of importance to students and researchers of Communication and Media Studies, Human Development and Family Studies, Psychology and Education. The interdisciplinary nature of the book (as it intersects the studies of Communication, Psychology and Education), makes it a valuable reference book for teachers, counsellors and behavioural scientists and educators as well as media policy makers. Very few books are available in the field of Children and Media Studies in the
HOW TO MANAGE CROP POLLINATION USING HONEYBEES AS POLLINATORS: TRAINING MANUAL	UMA Partap, Tej Partap, Gorakh Singh	PAPERBACK	Rs 350	2011, Reprint 2014	9788185873725	500	7.5" x 9.5"	128	Science & Technology, Agriculture, Horticulture, Agri Extension, Organic Agriculture, Entomology, Melittology	This manual about managing crop pollination using honeybees, is written in easy to follow language and is full of explanatory diagrams. It is written to serve as a guide to field extensionists and farmers, to promote wider use of honeybees for crop pollination. The manual consists of seven chapters supported by illustrations. Through these chapters, the manual explains how honeybees can be used effectively for cross-pollination to enhance productivity and yield of crops. It also describes the reasons how different kinds of bees are important crop pollinators; how bees pollinate crop; techniques for managing a

POST HARVEST HANDLING & PROCESSING OF FRUITS & VEGETABLES	I.S.SINGH & VINOD SINGH	HARDBACK	Rs 1,800	2014	9789383491117	675	7.5" x 9.5"	216	Science & Technology, Agriculture, Horticulture, Pomology, Vegetable Science, Spices, Post Harvest Technology, Agri Extension	The present book has been written into two parts. Part-I covers all the practices for post-harvest handling of fresh fruits and vegetables while Part-II covers processing of fruits and vegetables. It is hoped that the information provided in this book would serve as knowledge pool and help researchers, growers, processors, entrepreneurs, students of horticulture and food technology disciplines and all those involved in research and development in post-harvest management and value addition of fruits and vegetables.
CHHOO LO AASMAAN (Hindi)	PRADEEP K. SHARMA	HARDBACK	Rs 600	2014	9789383491094	375	5.5" x 8.5"	208		
VIRUS, VIROID AND PHYTOPLASMA DISEASES OF GRAPEVINES	S.J. SINGH	HARDBACK	Rs 4,000	2014	9789383491049	1575	8.5" x 11"	368	Science & Technology, Agriculture, Horticulture, Pomology, Virology	Thanks to Dr. S.J. Singh who has written the present book, a further information source on this important phytopathological subject is now available. Special care was taken in the organization of the wide range of topics covered. It contains detailed descriptions of the various grapevine infectious diseases as well as updated information on the biological, serological, molecular and epidemiological characteristics of their causal agents. Current methodologies for diagnostic purposes and possible control measures are also well illustrated. For these reasons, the book should be considered a valuable document for scientists, technicians and students involved in plant pathology and viticulture
FOOD NUTRITION AND DIET THERAPY	RITA RAGHUVANSHI, MONIKA MITTAL	HARDBACK	Rs 1,300	2014	9789383491087	700	6.25" x 9.25"	368	Science & Technology, Agriculture, Home science, Food and Nutrition, Dietetics, Nursing, Medical, Public Health, Epidemiology	The book will surely provide a sound basis to all people curious about their health and diet. The book is designed to provide a sharp cutting edge understanding of diets' role in maintenance of health. Concepts and facts of nutrition related to disease have been minutely incorporated. The book is unique in itself for it contains details of diseases for reader to understand along with full dietetic management. The diet charts along with calculated nutritive values are the highlights and strong focus point of the book. The diet plans are planned strictly using Indian food stuffs and day to day recipes. The diet chart illustrations will help students in proper diet counselling regarding restrictions and liberal intake of foods. Foods allowed and foods to be avoided are distinctively given with every disease for better understanding and practical approach. The book will meet out demands of course outlines of subjects like diet therapy, clinical and therapeutic nutrition, diet and disease, dietetics and many more related courses.

SEED TECHNOLOGY: A PRACTICAL APPROACH	J.K. SHARMA	HARDBACK	Rs 700	2014	9789383491025	450	7.5" x 9.5"	108	Science & Technology, Agriculture, Horticulture, Seed Technology, Plant Breeding	The present book has been prepared to present a comprehensive view and in-depth insight of the recent advances in seed technology. The most vital key to meet out the demands of seed industry in the country is to maintain a large cadre of well trained and competent seed technologists. The book includes basic principles of seed technology and contains relevant information on techniques required for pure and healthy seed production, their storage and testing for
Madhumakhiyon Dwaara Fasloon Mein Prangand Prabandhan (Hindi)	Uma Partap, Tej Partap, Gorakh Singh, SK Malhotra	PAPERBACK	Rs 350	2014	9789383491001	400	7.5" x 9.5"	120	Science & Technology, Agriculture, Horticulture, Agri Extension, Organic Agriculture, Entomology, Melittology	This manual about managing crop pollination using honeybees, is written in easy to follow language and is full of explanatory diagrams. It is written to serve as a guide to field extensionists and farmers, to promote wider use of honeybees for crop pollination. The manual consists of seven chapters supported by illustrations. Through these chapters, the manual explains how honeybees can be used effectively for cross-pollination to enhance productivity and yield of crops. It also describes the reasons how different kinds of bees are important crop pollinators; how bees pollinate crop: techniques for managing a
ORGANIC SIKKIM: LEADING A CHANGE	TEJ PARTAP, CS VAIDYA	HARDBACK	Rs 1,200	20 14	9789383491032	275	7.5" x 9.5"	128	Science & Technology, Agriculture, Horticulture, Agri Extension, Organic Agriculture, Agri Economics	Dream remains dream unless converted into action and when that happens, it becomes a vision of a visionary. This book explains how dream of a visionary was transformed into a vision of an Organic State. Unique to Indian culture, a Chief Minister is able to envision an organic future of a mountain state and then starts to build institutional capacities and public opinion for achieving the goal. This success story unfolds the challenging risk undertaken by the Chief Minister and the positive impact organic movement has made in Sikkim.

PALMS	H.P. SINGH, GEORGE V. THOMAS	HARDBACK	Rs 2500	2014	9788185873916	925	7.5" x 9.5"	354	Science & Technology, Agriculture, Horticulture, Agri Extension, Plantation Crops, Agri Economics	This book on "Palms" provides a comprehensive coverage of palms giving details such as origin and distribution, morphology, medicinal properties and various value added products of commercially important palms (coconut, arecanut, palmyrah palm, date palm and oil palm) as well as various ornamental palms for landscape management and much more. A number of palm species discussed herein exemplify the multipurpose character of such palms which merit special consideration for their full range of products rather than for only a single
DIAGNOSTICS FOR HORTICULTURE CROPS	HP SINGH, M. ANANDARAJ, AI BHAT	HARDBACK	Rs 2500	2014	9788185873961	975	7.5" x 9.5"	364	Science & Technology, Agriculture, Horticulture, Plantation Crops, Pathology, Spices, Ornamentals	Horticultural crops are attacked by a large group of pathogens inflicting moderate to heavy crop losses. Due to the increased demand of fruits and vegetables and other horticultural products, more efforts are being put in horticulture sector for further boosting production to meet increased demand. Although availability of planting material and designer agro-techniques has increased in horticulture sector but biotic factors continue to be the bane of horticulture production. Crop health management during active growth phase and post harvest health management assumes significance to reduce the loss and increase the productivity. Production of quality planting materials is fast becoming an important input in disease management programmes especially in production of disease/virus free plants. Many accredited laboratories are being established to test the genetic fidelity and virus indexing of micro-propagated plants. In the present book, the available information on the disease diagnostic methods developed for fruits, vegetables, plantation crops, spices and ornamentals are presented in a detailed form. These are comprehensively covered with

GAUTAM	HARDBACK	Rs 1800	2008	9788185873404	800	7.5" x 9.5"	304		The book covers all aspects of biological control and gives the most up-to-date information on the principles and methods of biological pest suppression. The treatment is comprehensive. It further highlights the constraints in adoption of biological control, relevant terminology, establishment of research and commercial insectaries, sample collection, preservation and shipment of bio-agents besides diverse aspects of procedures in biological pest suppression. Also contains information about procedure for computation cost of production, proforma developed by CAB, UK for insect identification services, registration requirements/guidelines for bio-control agents as introduced by the government.
